

1. Install the H3R fire extinguisher mount to the R35 bracket using the supplied bolts, washers, and lock nuts.

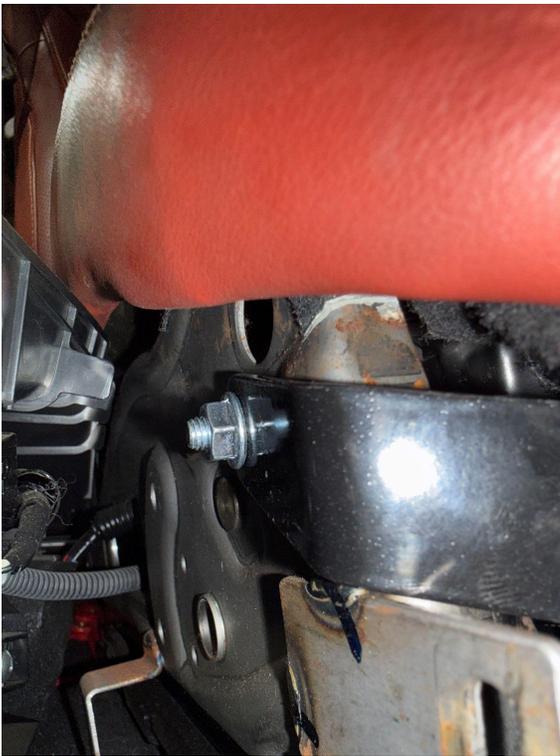

2. Remove the side cover panel on the seat by pulling towards you and then downwards.

3. Locate the side bolt hole behind the seat plastic, as well as the bolt hole under the seat.

4. Start by installing the bracket on the side first. It's much harder to get this bolt in, if you do the underseat bolt first instead.

5. Install the last bolt on the underside of the side.

6. Done.
